**Ask your photo dealer for these and other  
SAMIGON Quality Darkroom Products**

**Changing Bags**

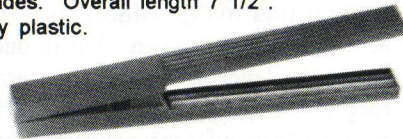

A "Portable Darkroom" that consists of double-zippered inner and outer cloth bags with elastic sleeves, which are 100% lightproof (even in bright sunlight). Have ample working space for loading cartridges, cut-film holders, developing tanks and opening cameras in emergency situations.

ESA917 Small, 17" x 16"  
ESA927 Large, 27" x 30"

**Plastic Film Squeegee #ESA275**

Compact, spring operated film wiper. 3 1/4" long ribbed soft rubber blades. Overall length 7 1/2". Molded of gray plastic.

**STATBRUSH2000**

Anti-static brushes that offer the most effective and efficient static control while cleaning sensitive surfaces.

Statbrush brushes use unique conductive fibers developed by PRO-CO for the dissipation of static charges on any surfaces. The critical mixture of conductive fibers with natural hair ensures both effective static control and efficient removal of dust and debris.

The STATBRUSH is designed and manufactured for optimum performance. The 30mm fiber length is critical and ensures performance and maximum anti-static effect. There is a thin metal plate insert in the handle of each STATBRUSH that, when the user touches it, enhances the anti-static effect by using the body as a static conductor. If Statbrush dissipates static 100%, then other brushes with longer fiber can be as little as 40% effective. Long haired brushes also lack the cleaning efficiency of STATBRUSH.

There are 2 size STATBRUSH brushes, 35mm and 70mm, both ergonomically designed for ease of use. STATBRUSH brushes offer a long effective life and can be easily cleaned with soapy water or alcohol.

EDS180 Statbrush 35mm (1.4" wide)  
EDS181 Statbrush 70mm (2.75" wide)

**Adjustable Dial Thermometer #ESA920**

Made of corrosion resistant stainless steel. Fits tank, tray or mixing vessel. Has clamp to attach to tray. 1 3/4" dial face (2 1/8" bezel to bezel) with accurate needle is easy to read with markings of one degree gradations. Reads both degree F and degree C. Accurate within one degree. 5" stainless steel stem fits all developing tanks. Hermetically sealed, fog and leak proof. 25° to 125° F or -5° to 50°C readings. Can be calibrated for greatest accuracy.

*SAMIGON products represent a commitment to excellence in design, construction and performance. It is no wonder that for over forty years discriminating photographers have chosen SAMIGON equipment as their most trusted working tools.*
